ABOUT

The Master's Degree in Engineering Management from the UF Department of Industrial & Systems Engineering in Jacksonville is for working professional students who want to accelerate management careers without losing their technical roots. The curriculum is a combination of technical and leadership courses and students will select a concentration for technical management in Data Analytics or Smart Manufacturing (starting 2027). Classes meet on the weekends every 3-4 weeks, allowing professionals to obtain an in-person UF degree, without a career interruption.
